

AI Workflow Audit

FL-01

Name

Shaik Raihan Basha

College

B.E.S.T. Innovation University

Tool Setup

- ✓ Claude Account
- ✓ Claude Project Created
- ✓ Anthropic Academy
- ✓ AI Fluency: Framework & Foundations

Recurring Tasks

#	Recurring Tasks	Classification	Rationale
1	Learn AI/ML concepts	Collaborate with AI	AI explains concepts while I ask questions and practice.
2	Debug Python code	Delegate to AI with review	AI helps identify bugs, but I verify and test every fix.
3	Build AI/ML projects	Collaborate with AI	AI assists with implementation while I design and integrate the solution.
4	Read research papers	Delegate to AI with review	AI summarizes papers, but I validate important findings.
5	Write internship assignments	Delegate to AI with review	AI drafts content; I edit, fact-check, and personalize it.
6	Prepare for AI interviews	Collaborate with AI	AI conducts mock interviews while I practice and improve.
7	Manage GitHub repositories	Just Me	I am responsible for commits, branches, and final submissions.
8	Make architecture decisions for projects	Just Me	Technical decisions require my understanding and accountability.
9	Create project documentation	Delegate to AI with review	AI creates the first draft, and I refine it for accuracy.
10	Plan weekly learning schedule	Collaborate with AI	AI suggests an optimized schedule that I adjust to my priorities.
11	Generate boilerplate code	Delegate to AI with review	AI speeds up development, but I review quality and security.
12	Research new AI tools	Collaborate with AI	AI compares tools while I evaluate which fit my needs.
13	Create LinkedIn posts	Delegate to AI with review	AI improves writing, but I ensure it reflects my own achievements.
14	Organize study notes	Fully Automate	AI can summarize and organize notes efficiently with minimal oversight.

#	Recurring Tasks	Classification	Rationale
15	Schedule reminders and routine planning	Fully Automate	AI tools can automatically manage reminders and recurring tasks.

Target Tasks That I Will Reuse

#	Task	Done Well
1	Debugging AI Projects	• Bug identified correctly • Solution tested successfully • No new errors introduced • I understand why the fix works
2	Writing Internship Assignments	• Original and personalized content • Correct grammar and formatting • Meets assignment requirements • Submitted before the deadline
3	Learning AI Concepts	• Understand the concept clearly • Explain it in my own words • Apply it in a small project or exercise • Retain it through practice
