B.Tech CSE | AI/ML Enthusiast

PROFILE SUMMARY

Final-year B.Tech CSE student (CGPA: 8.71) passionate about AI/ML and LLM-based systems, Experienced in building scalable AI-driven automation systems using Make.com, leveraging LLM integrations, APIs, and connected cloud applications to eliminate manual workflows and improve operational efficiency. Currently interning as an ML Engineer at FlyRank AI, with a strong drive to deepen expertise in machine learning and contribute to production-grade AI systems

TECHNICAL SKILLS

- **AI/ML:** Prompt Engineering, AI Workflow Design, NLP Fundamentals
- **Programming:** Python
- **Automation & Integration:** Make.com, Webhooks, JSON
- **Cloud Platforms:** Oracle Cloud Infrastructure (OCI), Azure (Foundations)
- **Tools:** VS Code, Ollama, OpenCode, Git & GitHub

PROJECTS

ExtractIQ Engine — AI-Powered Structured Data Extraction Platform

- Built a production-ready AI extraction engine that converts noisy customer support tickets into validated, schema-compliant JSON using LLMs and Pydantic
- Designed a Model-Driven Repair Loop that automatically re-prompts the LLM using validation errors, eliminating regex-based fallbacks and improving extraction reliability
- Developed a full-stack application with analytics, batch processing, extraction history, and production-ready REST APIs, then deployed the backend on Render and frontend on Vercel

Tech: Python, FastAPI, React, TypeScript, Pydantic, Supabase(Postgres DB), Featherless AI, Instructor, Render, Vercel

CareerBridge AI — AI-Powered Career Intelligence System

- Built an AI-powered career system that analyzes resumes, identifies skill gaps, and generates personalized learning roadmaps aligned with target job roles.
- Developed an intelligent evaluation pipeline integrating local LLM (Ollama) for resume analysis, ATS scoring, skill-gap detection, and career recommendations with interactive visualizations.
- Engineered a full-stack application with secure authentication, analytics dashboards, and real-time progress tracking to help users improve interview readiness.

Tech: Python, FastAPI, React, TypeScript, Tailwind CSS, SQLite

AI Resume Screener (Workflow Automation)

- Built an AI-based system to match resumes with job descriptions using structured data extraction
- Automated skill extraction and relevance scoring to assist faster and more accurate screening
- Reduced manual resume screening effort by streamlining initial candidate filtering

Tech: Make.com, AI APIs, Webhooks

EDUCATION

B.Tech – Computer Science Engineering Bharatiya Engineering Science & Technology Innovation University

Aug 2023 – Jun 2027 | CGPA: 8.71

Intermediate (PCM) – 72%

S.B.T.R.M. Jr College | Apr 2021 – Mar 2023

Secondary School

Sri Chaitanya School | Jun 2021

CERTIFICATIONS

Oracle Cloud Infrastructure – AI Foundations Associate (2025) - Fundamentals of AI, ML concepts, and cloud-based AI services.

Google AI Essentials (Coursera) - Practical foundation in generative AI tools, prompt engineering, and responsible AI use.

Python Certification (TestDome) - Validated proficiency in Python programming and problem-solving.

ADDITIONAL INFORMATION

- Quick learner with ability to adapt to new tools and technologies rapidly
- Interested in solving real-world problems using AI and automation
